

# Study QUESTIONS

## Ep. 1062: Does Science Prove Intelligent Design?

<https://christianquestions.com/doctrine/intelligent-design/>

See:  CQ Rewind  
SHOW NOTES

1. How do you believe that everything as we know it was created?
2. What characteristics must the Creator of the Universe have if the universe has a beginning? Does the Bible describe God as having these characteristics?
3. What are some flaws of the atheist argument that something can come from nothing?
4. What are some examples of physical constants? What does the extreme precision of these constants tell us about the design of the universe?
5. What is “scientific materialism” and how does it constrain scientific explanations of the origin of life? What is the current theory on how life can be produced from non-life?
6. How does science look at DNA? Scientifically, what does this, combined with the complexities of DNA, point to for how DNA was formed?
7. What are “flagellum” and “kinesin”? What makes them so incredible? What does this suggest about how they were developed?
8. What makes the monarch butterfly and its life cycle incredibly unique? What does this suggest about how they first came alive?
9. If God created the universe, who created God?
10. What properties of water make it unique? How about oxygen and the earth’s atmosphere? How do these properties make the earth inhabitable for humans?
11. What makes human beings unique? What does this suggest about our universe?
12. Looking at all the scientific evidence given, has your answer to question 1 changed? If so, what is your answer now?
